JOSHUA M. JONES

Experienced, effective web application developer with 8+ years of experience building, maintaining, and enhancing data driven and marketing web applications; self motivated, well versed in agile development methodologies, and able to contribute at any point of a project.

EXPERIENCE

SENIOR DEVELOPER
Power Agency
11.2014 -

Worked with team on multiple concurrent large scale web projects. Migrated multiple projects to cloud based hosting solutions with modern DevOps based release workflows (AWS, Heroku). Lead design, implementation, training and adoption of JIRA for 100 users and worked to introduce Agile methodologies to projects. Built several custom web-based tools for internal resource managers and project managers. Currently working to integrate Git/Jenkins based internal DevOps workflow to development team.

DEVELOPER/UX DESIGNER
Freelance
2008 -

Various projects including construction firm's invoice and work order management application, custom Wordpress websites, design and development of Javascript tools for luxury travel online website.

LEAD DEVELOPER
SwiftTrip/ALTOUR
11.2010 - 11.2014

Responsible for several travel related web applications including an online travel booking system, travel planning tool, fare analyzer, other ancillary travel utilities. Leader of core team of 5 developers, sys admin, QA/System Analyst, and several offshore development groups. Designer and architect for each application from DB, frameworks, UI, and UX. UI/UX leader and manager for offshore iOS/Android development group for mobile applications.
